

MSc Facilities Management (Distance Learning)

in association with Leeds Beckett University, UK

Introduction to the Course

The **MSc Facilities Management** course is a part-time distance learning course. The program allow flexibility and all sorts of materials are downloadable from internet.

Recognised by the Institute of Workplace and Facilities Management (IWFM), this course will develop your management skills so you can ensure the functionality, safety and efficiency of your work environment by integrating people, place, process and technology.

As part of your course, you'll demonstrate skills in effective service provision and monitoring; gain an understanding of business strategy, cost control, people management and property-related issues; develop your knowledge of health and safety, risk management and business continuity and research capability and cognitive skills, enabling you to analyse and resolve problems in your profession etc.

A number of assignments will involve practical work and case studies. These will provide opportunities to address situations and issues highly relevant to your workplace which you can then apply to meet your organisation's operational needs. You'll find you approach your work with improved confidence.
